Define a Problem statement & Given a brief executive summary Snapshot

- A] Executive summary.
- B] Project Description
- C] Project scope.

A] Executive Summary.

The attendees Management system (AMS) is a software solution designed to streamline the process of managing participants events, conferences, meetings, & other gatherings.

The system aims to automate registration, check-ins, & communication providing organizers with real time data & analytics by integrating various functionalities into one platform. The AMS enhances efficiency, reduces manual errors, & improves the overall experience for both organizers & attendees.

## B] Projects Description :-

The AMS is intended to be a comprehensive tool that caters to the needs of event organizers. It includes features such as online registration.

attendee tracking, automated communication & reporting. The system will be web-based & accessible from any device allowing for flexibility in managing events for any size.

## c) Project Scope:-

The scope of The AMS Projects includes The desing, Development, & Deployment of The system. The project will be executed in several phases:

- Requirements Gathering:-

Identify The Needs of The stakeholders.

- Define The technical & functional requirements of The system.
- Define The technical & functional requirements of The system.

### System Desing:-

Develop The architecture of The system, including user interfaces & Database structures.

- Create wireframes & Prototypes for initial feed back.
- Development:-  
Build The front-end & back end components of The system.
- Integrate features such as registration, Tracking, Communication & analytics
